

# permaban *Signature*®

## Disruptive face technology for construction joints

### No impact – no damage

Permaban Signature® is an armoured joint like no other. The clever half-hexagon shape – called 'disruptive face' technology – prevents the wheels of materials handling vehicles from dropping into the gap between the two edges of the joint. Because there's no impact, there's no damage to either the joint or the truck.

### Ideal for aisles – perfect for flexibility

Directional traffic is no problem for Permaban Signature®. Approach it from any angle – even 90° – and the result is the same: smooth, fast, noiseless transit.

With Permaban Signature® you can build in flexibility from the start. Even if the building configuration changes over time, the joints will still be fully protected.

### Reliable load transfer

Permaban Signature® incorporates square dowel bars, easily fixed into the joint so correct alignment is assured. The extruded sleeve allows for lateral movement.

### Even more reasons to choose permaban *Signature*®...

- Because Permaban Signature® operates with gaps up to 40mm, it's ideal for popular large-bay jointless concrete floors.
- Full-depth corrugation means the top of the joint is fully supported underneath, for maximum strength and stability.
- Permaban Signature® is supplied in 2.1m lengths as standard, so it's economical to pack and ship.
- Eliminating the need for heavy armouring, Permaban Signature® is lighter and stiffer than many joints – making it easy for operatives to lift, manoeuvre and install on site.

At Permaban, we understand concrete floors. All around the world, for over 30 years, concrete floors have been constructed using our joint systems and the floor surface enhanced with our dry shake toppings, surface sealers and joint sealers.

Our true strengths lie in our technical knowledge and product design. We're known for providing design guidance, support and advice to specifiers, clients and contractors alike. When a special product is required for an application, our engineering and design team has the expertise to help, under the disciplines of our ISO9001 accreditation.

A truly international company, we have strong alliances worldwide and an extensive distribution network.

We're proud to list many of the leading logistics, manufacturing, retail and commercial companies in the world as our clients.
