

SURE-STOP® PVC WATERSTOP WELDING EQUIPMENT

1. The Welding Iron comes with a temperature control adjuster and a non-stick teflon coating to help prevent the molten PVC from burning and sticking to the iron during undertaking of the joining/welding procedure.
2. Refer to **CORKJOINT**'s Sure-Stop® PVC Waterstop Site Joining Guidelines for further information pertaining to the PVC Waterstop's joining/welding procedures.

The information and the recommendations relating to the application and end use of this product are given in good faith and are based on the information provided by the manufacturer of the product and/or the Company's current knowledge and experience in connection with the product when properly stored, handled and applied under normal conditions and no liability of final function at the job site is assumed. In practice, the differences in materials substrates and actual site conditions are such that no warranty in respect of merchantability of or fitness for particular purpose, nor any liability arising out of any legal relationship whatsoever, can be inferred either from this information, or from any written and/or oral recommendations, or from any other advice offered by the Company. The Company also has no express or implied knowledge of any particular purpose for which the product is required and any such information given will not be taken into account in the supply of this product. No responsibility or liability by the Company will be accepted for misuse, misreading or derivation from recommended guidelines in respect of this product and the user shall determine the suitability of the product for his intended use and assume all risks and liability in connection therewith. The information contained in these documents may change at any time without notice. Any use of this product in any application should be approved as suitable for use/application by the Design Engineer and Project Manager.
